

Proposal for DaLiCo Workshop on Thursday, 28 October / 11.00 – 12.00 (CET) – ONLINE

Title: Data Literacy and Data Science - Experiences from the DaLiCo Summer School 2021

Introduction:

This Workshop offers insights into concepts and practical work of the Erasmus+-Project Data Literacy in Context (DaLiCo <https://dalico.info/>). Partners from the Carpe network in Debrecen, Valencia, Utrecht and Hamburg work together to foster data literacy education at their universities.

As an example how to connect Data Literacy with Data Science approaches we would like to introduce the concept and results from the summer school “Data Literacy in Health”, from August 2021, which was led by the partner university Hogeschool Utrecht. Further information: <https://projects.dalico.info/>

Aim of the session is:

- To discuss the concept and share their experiences with data literacy in data science.
- To showcase the summer school results
- To discuss best practices in working with Dataiku

Agenda

- Welcome and introduction to session (University of Valencia)
- Group work on Data Science topics
- Discussion

Organisers

Christine Glaeser, HAW Hamburg christine.glaeser@haw-hamburg.de

Guido Ongena, University of Applied Sciences Utrecht guido.ongena@hu.nl
